ROME MONUMENT

Brilliant Impressions offered by Rome Monument is a new technology which can add color to the 3-D relief image of your memorial. Your selected pictures literally jump off of the memorial while memories come streaming back just as they did when you searched through your photo albums. Brilliant Impressions technology was designed to complement several different patent pending processes utilizing the finest state-of-the-art color imaging equipment. The result is vibrant color images which seem to add another dimension to the complete line of products. To protect your memorial, Durasheen clear coat protects your memorial for years to come and comes with our unparalleled 15 year, limited warranty.

Brilliant Impressions Gallery Series

The gallery series offers inspirational scenes from nationally known artists to your memorial. These peaceful and serene images make beautiful backdrops to any memorial.

Bronze

This everlasting metal has been the material of choice for centuries for honoring and remembering a life once lived. Literally millions of bronze memorials adorn our nation's cemeteries. Though traditional bronze memorials have a beautiful classic look, they do not have the ability to tell the story of one's life.

Today

Rome Monument is proud to offer the finest bronze memorials ever produced that depict true personalization. New technology has allowed family's to select actual images of their loved ones and have them created in colored 3-D relief on a bronze memorial.
